RAN and DAS
Global Product Owner Director

JMA solutions

DAS

Complete product line from 5G capable antennas through baseband. Includes coverage from 600 MHz through 40 GHz

2 out of 3 US stadiums choose JMA DAS for performance benefits

Private Networks

Mobile private network solution designed around virtualized RAN and multi-band radios

JMA serve high connection density enterprises such as stadiums, universities, hotels, etc.

Carrier Networks

Carrier-grade, Open RAN baseband with multi-vendor interoperability

XRAN has proven its performance scalability in macro multi-vendor (Open RAN) deployments

Benefits of a JMA's Solution

5G

100% software means faster upgrades
No rip & replace and a smooth migration

Security

Superior data protection & cyber-security
Zero trust end-to-end architecture

Scalable

Large area coverage – 8x more than Wi-Fi
Single JMA X-RAN shelf covers to 250K S.F.

Agility

Delivers on business IT mobility
Eliminate wires, discover new mobility

Speed & Performance

Over 150 MHz per radio for >1 Gbps
capacity

Independence

Control your venue connectivity

Slice & Prioritize

Slice capacity into service layers
Set priorities of specific wireless traffic

One Wireless Network, Multiple Uses

Lower TCO with multi-operators and
multiple private services in a single
wireless infrastructure
